Keep the Pneumatics & Get Electronic Features without any Wires!

Models: WT-4002-MFR and WT-4002-MFM
available at **\$295.00 each!**
Order yours today!

FINALLY! An electronic stat that replaces your pneumatic stat! The JCI **WT-4000** takes the same existing supply air in; and has same output, but it never needs calibration, and it can connect wirelessly to your existing building automation system (If you have one)! Or, it can stand alone and users can take advantage of energy savings by utilizing the built-in occupancy sensor contacts.

Johnson Controls
WT-4000 Series
Digital Thermostats

The WT-4000 Series Room Thermostats are ideally suited for energy-saving, pneumatic-to-DDC building upgrades. Designed for non-invasive replacement of existing manual pneumatic thermostats, the WT-4000 Series Room Thermostats provide a number of DDC features, including remote wireless set point control and occupancy scheduling, and continuous room temperature, branch line pressure, and battery status monitoring. All of these features were previously unavailable in existing pneumatic HVAC control systems.

FEATURES & BENEFITS

- * Eliminates the need for mechanical calibration
- * Provides real-time status for proper room thermostat operation
- * Allows the room thermostat to be configured in the field for stand-alone applications
- * Programmable temperature control schedule-maximizes energy savings without sacrificing occupancy comfort
- * Two-pipe direct acting/reverse acting DA/RA dual control action-allows replacement of a wide variety of existing pneumatic room thermostats
- * Liquid crystal display -provides an intuitive user experience, with real-time indication of control system and room conditions.
